1.8 Data quality & analysis plan	<p><u>COPD, adult asthma, children and young people's asthma and PR</u></p> <p>The audits are currently running continuously. The audit datasets will be reviewed and streamlined annually. This will involve consultation (including with patients/carers), review of poorly completed/highly burdensome items, and reappraisal of the evidence.</p> <p>Comprehensive validation rules are built into the web-tool to ensure that incorrect, conflicting and/or illogical data cannot be saved. Pop-up warnings appear for values that are plausible, but rare. There should be no missing data, as all questions are 'mandatory' and records cannot be locked until all data items are completed. If sites attempt to lock an incomplete record, a pop-up appears, directing them to the incomplete fields.</p> <p>https://www.rcplondon.ac.uk/file/42891/download - combined report methodology report</p>
